WVNE
760 AM

Lincoln W. Hubbard
52 Park View Ave.
Warwick, R.I.02888
January 25, 2000.

Mr. Philip Greenspan
101 Forge Lane
Marshfield, MA

Dear Philip,

Re: Your letter of January 17, 2000 to me about reception of WVNE January 17, 2000.
Your details of programs heard are correct.
Below is a copy of a DX letter I used seven years ago. It has more info on the station.

Some notes on station WVNE 760 Khz
Owner William Blount
Incorperated as Blount Masscom
Studio address 70 James St. Worcester. Mass.
The transmitter is located in North Brookfield, Mass.
Transmitter CCA 10 KW. (Installed a CCA 25KW March 1994)
Antenna single tower 199 feet , top loaded. (Unipole 11-93)
Began broadcasting June 22, 1991 Daytime only.
Low power transmitter 27.0 watt post sunset.
The programming is similar to WARV.

I have an OK to run a test on WVNE. The suggested date of Feb 24, 1992 is ok with me. The time will be 4:00 AM to 5:00 AM. Be sure all correspondence comes to me at 52 Park View Ave Warwick RI. 02888. Too easily lost if sent to the studio. I can make a morse code tape. I will be in touch with you again but this should get you started.
Please send me a copy of the DX MONITOR this is mentioned in.

Yours in CHRIST
Lincoln W. Hubbard
Lincoln W. Hubbard, N1ATU, CE of WARV, WVNE.
(actually the only engineer of each)

Enclosed a tract, and a program guide and bumper sticker. for each station.
PS In May of 1994 WVNE began broadcasting with a brand new 25KW CCA transmitter serial # one.
Jan 25 2000, This has been a privilege for me for this test. The station has automation but I chose to go manual for 100% guarantee of broadcast. The studio is one hour travel away. One late afternoon program has a regular listener in Switzerland.
I am 73 years old, by the Grace of God, He gets me up each day. Thankful to be able to go to work. L.W.H.
